

# HANDHELD HYDRAULIC EQUIPMENT

*Atlas Copco*

# ***YOUR BUSINESS IS IN GOOD HANDS***

Hydraulics lets you do more in less time. It allows tools to hit harder with less vibration and noise. Hydraulics is simply better.

The first time you see a hydraulic breaker you might think it's nothing special. It's compact, quiet and appears to vibrate less than electric and pneumatic tools. But there's more to it than meets the eye.

When you press the trigger you'll be in for a surprise. Hydraulic oil is a powerful energy transmitter. A nine

horsepower power pack delivers the same power at the tool tip as a 20 horsepower diesel compressor engine.

In fact, for the price of one compressor and breaker you can buy two complete hydraulic power pack/breaker packages. And hydraulics pays even when it's turned off. The energy efficient power packs are

small enough to fit on a shelf or in a service van saving you fuel. Two people can carry the power pack with ease.

If you already use hydraulic tools, you know what you get. If you're new to hydraulics, you and your business are in good hands.

# KNOW YOUR *HYDRAULICS*

Here are the essentials on why and when hydraulics is the best choice to get the work done on time and on budget.

With just one or two moving parts, there's minimal wear and very few parts to replace. These tools require very little service. Hydraulics work in a closed loop so dirt and moisture are kept out. And due to the no-spill, flat-face couplings, it's easy to keep the system clean. Hoses are fitted with high quality couplings, they comply with EHTMA (European Hydraulic Tool Manufacturers' Association) standards. That means

easy, fast and safe connections even in applications with high concentrations of dust and dirt. Operators like hydraulic tools because they offer lower vibrations than many other tools available on the market. And since they don't emit any exhaust air, noise levels are kept down. Many times, you won't even need a power pack at all. Hydraulic

tools can be connected to a range of different power sources such as excavators, trucks, skid-steers and tractors. That means hydraulics is great for those quick one-day jobs: fencing, braking up paving for cables or piping.

## HYDRAULIC GUIDE

### HOW

It's a closed loop system with minimal wear and very few parts to replace.

### WHY

Hydraulic systems are practically maintenance free and has the best power to weight ratio of all power systems.

### WHAT

Hydraulic oil can withstand extreme pressure and that makes it a powerful energy transmitter.

### WHO

Great if you are part of a construction firm, a rental firm and if you are a professional on the move who need lots of power for one tool at a time.

### WHERE

Hydraulic tools are great on the road, in a mine, on a farm or a construction site. High power to weight ratio means the power pack fits in an ordinary service van.

### WHEN

To handle every challenge fast with lots of power.

# THE *ULTIMATE* POWER COMBO

Hydraulic solutions give the best power to weight ratio available. The multitude of tools and light, yet impressive power packs create the ultimate work combination.

## THE *P.O.W.R.* OF HYDRAULICS

The P.O.W.R. of hydraulics lets you change tools with ease and run all available tools with the same power pack or excavator.

### **PERFORMANCE** - AT LOW COST

Buy two complete hydraulic power pack/breaker packages for the price of one compressor and breaker. More power at less cost.

### **OUTPUT** - AT SMALL DIMENSIONS

Take this example: A nine horse power hydraulic power pack delivers the same power at the tool tip as a 20 hp diesel compressor engine.

### **WHEREVER** - EASY ACCESS ON SITE

The incredible power-to-weight ratio lets you carry around lot of power on your own. And the power packs are small enough to fit in a van.

### **RELIABLE** - MORE UPTIME

With just one or two moving parts, there's minimal wear to hydraulic tools and very few parts to replace.

## APPLICATIONS

### 1. PUMPING FOR SAFETY

A hydraulic pump has few moving parts and can handle clean and contaminated water, mud, slurry and particles of up to 60 mm in diameter.

### 2. POST RAMMING BY REMOTE

Our hydraulic post rammer is nimble and can be fitted with a valve for remote action. It's great for both tall and short posts.

### 3. POWER FOR ALL OCCASIONS

Working indoors? Or do you use diesel fuel for other machinery and would like to use it with your hydraulic tools as well? There is a power pack for all occasions.

### 4. GO WITH THE FLOW

The LFD oil flow dividers are great for every tool that is connected to a source with more

flow than the tool is designed for. And they allow HBP-versions to be attached to an excavator or skid steer.

### 5. ROCK DRILLING

Hydraulic tools pack the best punch and vibrates less than other tools connected to other power sources. That means you can work longer and be more efficient.

### 6. CUTTING

Cut concrete, asphalt and steel. Direct drive and simple machinery means high productivity and reduced maintenance.

### 7. CORE DRILLING

Core drills are relied on to install drainage, sewer and water pipes, plus cable and ventilation ducts where large and deep holes are needed.

### 8. HORIZONTAL WORK

The LH11 pick hammer is ideal for horizontal work in brick, mortar and light concrete. Combined with an electric power pack it's an unbeatable indoor companion.

### 9. BREAKING BETTER

Our breakers come in three versions: Standard, E and HBP. The E-versions reduce vibration by around 70 percent compared to a standard breaker. The HBP is especially made to accept higher back pressure in the return line. HBP breakers can be operated from almost any hydraulic outlet.

# BREAK ANYTHING ANYWHERE

We can help you handle any situation where a breaker or hammer is required. With the right tools you can break anything, anywhere.

**PICK HAMMER** **HORIZONTAL SPECIALIST**

The LH11 is ideal for horizontal demolition of brick, mortar and light concrete. It has a D-handle and a detachable front handle as option. The LH 11 is a great choice if you work in renovation, demolition and for structural alteration jobs.

**LIGHT-WEIGHT** **LIGHT MULTI-PURPOSE**

Our LH 180 and LH 190 E are used to break brickwork, frozen soil, asphalt, concrete, as well as for tamping and compaction. The breakers are popular with contractors and rental firms for indoor and outdoor renovation and demolition jobs.

**MEDIUM WEIGHT** **MEDIUM MULTI-PURPOSE**

The LH220/230 E are among the best general purpose breakers available in the 23-28 kg range. They are commonly used with 5" asphalt chisels for road building and maintenance applications, but also work well in brickwork, frozen soil and concrete.

**HEAVY-DUTY** **HEAVY MULTI-PURPOSE**

Breaking frozen soil, asphalt and reinforced concrete takes heavy-duty breakers. The LH 270 and LH 280 E are considered among the best in their class.

**SUPER HEAVY-DUTY** **WHEN THE GOING GETS TOUGH**

The LH 390 and LH 400 E are two of the most powerful handheld breakers in the world. They are used for demanding jobs in heavy asphalt, reinforced concrete and foundations.

All HBP breakers come with nipples that allows the breakers to be operated at different l.p.m than they are factory set to.

Standard breakers (incl HBP version)			LH 180	LH 220	LH 220 HBP	LH 270	LH 270 HBP	LH 390	LH 390 HBP

1) LH 180 and LH 220 measured with Hex 25, LH 270 and LH 390 measured with Hex 32. 2) LH 180 and LH 220 measured at 20 l/min, LH 270 and LH 390 measured at 30 l/min.

3) Important: Full details of measurement are available in the Safety and Operating Instruction of the product (part no 3392 5206 01). It can be found on [www.acprintshop.com](http://www.acprintshop.com)

## Pick hammer

### Easy gripping

The D handle is easy to grip. It also has a removable front handle as option.

**LH  
11**

### Light weight

LH11 is ideal for horizontal work in brick, mortar and light concrete.

## Multi-purpose breaker

### Healthy

Low vibration values, low noise levels and slim design makes this breaker a tool to use for many years to come.

### What to break

The LH 230 E is perfect for medium and hard materials such as asphalt and concrete

### You've got power

High power to weight ratio means you get more done with a smaller breaker.

**GREAT  
ERGONOMICS**

### E = Ergonomic

The vibro reduction abilities of this breaker lets you work for more than 8 hours without risking injuries.

**LH  
230<sub>E</sub>**

## Rock drill

# HARD ROCK HARDER HYDRAULICS

Rocks are hard. Just like our rock drills.

This lightweight tool is designed for drilling blast, anchor and rock splitting holes. The LHD 23 M rock drill is used for example by contractors, armies and utilities who want convenient and efficient way to drill without a large compressor. With standard integral steel, it drills diameters of up to 50 mm and depths down to approximately six meters. The LHD 23 M uses hydraulic power for impact and rotation. A small additional compressor is needed for flushing.

### When to use it

When you want convenient and efficient drilling without large compressors.

### What you can do

The LHD 23 M drills down to six metres depth (20 ft) and up to 50 mm in diameter (2 in).

### You're protected

The torque limiter prevents a kick-back when you're drilling.

### Better drilling

A drifter version for separated operation of impact and two way rotation is available

#### ACTION 1: PERCUSSIVE IMPACT

Percussive drilling breaks the rock by hammering impacts transferred from the rock drill to the drill bit at the bottom of the hole.

#### ACTION 2: FEED FORCE

The purpose of the feed force is to keep the drill bit in close contact against the rock. The engineering challenge is to combine high feed force with good rotation.

#### ACTION 3: ROTATION

Rotation moves the drill bit to a new position to make the next blow as effective as possible. When the drilling starts you need even and smooth rotation.

#### ACTION 4: FLUSHING

Drill systems with a high output need good flushing technology to be able to remove drill cuttings. Particle size, shape and material affect the flushing methods.

Rock drill		LHD 23 M
Weight (incl hoses)	kg	26

## Submersible pumps

# HYDRAULICS MAKES PUMPING SAFER

Submersible pumps are machines that simply mustn't fail. That's why you should go hydraulic.

Submersible pumps are used in a wide range of applications. They are great at continuous pumping of clean or contaminated water on building sites. And they do marvels in flooded excavations and cellars. The pumps are driven by a built-in hydraulic motor featuring a special drive shaft, seal and bearings. Our pumps are cooled and lubricated by the hydraulic oil and can be left to run dry without damage. The performance is impressive considering their size and weight. They provide heads of 25 and 32 meters and output of 840 and 1,920 l/min.

The two inch submersible water pump can handle small stones and debris of up to 10 mm. It's an ideal all-round pump for municipalities, water and waste utilities and rescue services. It is also widely used in general construction and road services /maintenance work.

The three inch submersible trash pump can be used in similar applications. But the LTP3 can also handle more extreme contamination. It pumps mud and slurries containing stones and particles of up to 60 mm in diameter.

Pumps		LWP 2	LTP 3
Weight (rounded)	kg	11	13
Width	mm	225	300
Oil flow	l/min	18-24	26-38
Working pressure	bar	100	140
Max pressure	bar	172	172
Pump head max	m	25	32
Pump flow max	l/min	840	1,920
Discharge	in	2	3
Solids handling up to:	mm	10	60
EHTMA class		C	D
Part number <sup>1</sup>		1806 1014 34	1806 1014 35

1) 10 m hose included.

### All rounder

The LWP 2 is great for municipalities, water and waste utilities and rescue services.

### Safety first

The hydraulic motor is spark proof and it can run dry without risk of being damaged.

## LWP 2

### Light weight

The LWP 2 only weighs 11 kg (24 lb) and fits easily in confined spaces.

### Give it any task

Pumps clean water, contaminated water and slurry.

### Easy handling

The LWP2 comes with a ten metre discharge hose fitted with quick-release couplings.

### Spark proof

A spark proof motor is an important safety measure when pumping contaminated fluids.

**GREAT SAFETY**

### Where to use

Use the LTP 3 on building sites, in flooded excavations, cellars and in wells.

## LTP 3

### Easy handling

The LTP3 is equipped with a ten metre discharge hose and quick-release couplings.

### Heavy-duty dirt

The can handle extreme contamination; mud and slurries containing particles of up to 60 mm in diameter.

Extra hose		2 inch	3 inch
Length	m	10	10
Connection	mm	50.8	76.2
Weight	kg	3.4	3.8
Comments		Snap-lock quick-release coupling, female

## Cut-off saws

# SIMPLE MEANS SHARP

Make a quick job of cutting concrete, asphalt and steel. It's simple.

Our hydraulic cut-off saws are simple in design – but don't be fooled. The direct drive and simple machinery means high productivity and reduced maintenance – especially in comparison with belt-driven saws. The compact, slim design and open cutting face give you a good overview of your work. With the help of a lightweight cart you can use the saws for floor, road and other light surface jobs. And thanks to hydraulics and direct drive the saws work perfect even under water.

### Simple and strong

The LS 16 and LS 14 are simple in design. That means less maintenance and more done.

**SAVE TIME AND MONEY**

### Power to cut

The power-to-weight ratio is high and the direct drive makes the saw efficient.

**LS 16**

### Sight for safety

The cutting face is clearly visible while you are working.

### What to cut

Put the saw to work on concrete, reinforced concrete, asphalt and steel. Use dry and wet diamond discs and abrasive steel cutting discs.

### Be mobile!

With the optional lightweight cart you can make straight cuts with ease.

Cut-off saws		LS 14	LS 16
Weight (incl hoses)	kg	12	13

## Core drills

# WHEN YOU NEED CORE CONTROL

Torque is good but you need control to be safe. Our hydraulic core drills are both safe and powerful.

Due to the hydraulic control of the drill torque, these core drills give very low kickback should drill bits jam. This helps you to maintain control, even when working on holes of 200 mm in diameter and above. Core drills are used by professionals in a wide range of applications including building renovation and utility works. They are relied on to install drainage, sewer and water pipes, plus cable and ventilation ducts where large and deep holes are needed. Core sampling in asphalt roads is another perfect application for this high performing drill.

The core drills offer spark-free operation – since there are no electrical components – and so can be used inside buildings and even underwater. With a standard round, 60 mm front-end, you can use Atlas Copco core drills with the majority of commonly available drill stands.

### Well prepared

The core drills are prepared to fit in standard drill stands.

### Get stronger

The LCD 500 and 1500 can be used for wet diamond core drilling on the toughest jobs

## LCD 500

### No sparks

There are no electrical components, which means it's safe to use the hydraulic core drills indoors and even under water.

### Safer with torque control

Due to the non-kick back operation, you can drill holes of up to 200 mm (8 in) in diameter free hand.

### Easy transport

To make transport safe and easy, the core drill is delivered in a strong steel case.

### Use any drill stand

The standard round, 60 mm front-end means you can use the majority of commonly available drill stands.

## Post drivers

# DRIVE POSTS BY REMOTE

The push-down trigger system is perfect for driving light fences, tent stakes and ground rods. A remote valve gives you extra reach.

The LPD-LD is the perfect all-round driver. It has an built-in anvil and a front end that allows for a quick mount of adaptors and bushings for small diameter rods. Special composite guiding bushings called PTFE protects the zinc or copper surface from the driving rod. The sliding surface of the composite material permits smooth, low-friction operation.

The LPD-T comes with a standard 0.5 meter quick-release coupling tail hose. It has a build-in start/stop trigger that the you can activate directly on the driver.

The LPD-RV comes with a two meter long tail hose. It has a remote on/off valve, which allows you to activate the driver when it is placed on top of tall posts.

The post drivers accept a high back pressure in the return line, which allow you to operate from almost any hydraulic outlet – even on skid steers with high return pressure systems - or when extremely long hoses are needed.

### Multi-purpose

The post drivers provide stable, powerful, high speed driving for a variety of post sizes.

### Short poles

The driver has a built in on/off valve for short pole driving.

### Composite protection

PTFE composite guiding bushings protects the inner surface from friction.

### Remote

The remote-controlled valve lets you run the driver with both open- or closed-centre systems.

LPD  
HD-RV

### Great for ...

Drive in road barrier tubes, profiles, signposts, fences and a wide range of anchors and poles.

LPD  
HD-T

### Multi-hydraulic

The post drivers allow you to operate from almost any hydraulic outlet.

### LPD Adaptor

There are several adaptors for our hydraulic drivers.

Post drivers		LPD-LD-T	LPD-T	LPD-RV	LPD-HD-T	LPD-HD-RV

1) Service weight will depend on size of adaptor. For further information, consult operating manuals. 2) With square adaptor, 54 mm 3) With anvil rod and head, 148 mm

4) Important: Full details of measurement is available in the Safety and Operating Instruction of the product (part no 3392 5036 01). It can be found on [www.acprintshop.com](http://www.acprintshop.com)

Guide adaptors and solid adaptors, please go to page 18 .

## Hole borer and puller

### BEAT THE HARDEST

When you are facing stones and hard soil this post hole borer is your friend.

Compact and powerful, this tool drills holes in hard soil and sand of up to 1.3 meter in depth and 90-350 mm in diameter. It offers reversible rotation and is designed for two-person operation. All augers have interchangeable bits for increased service lifetime. The auger is ideal for fencing and tree planting. It has two-way operation and adjustable torque settings. That means the LPHB can also be used for many other operations with special adaptors. You can for example use it for opening and closing main water line valves.

**LPHB**

#### Beat the stones

Two way rotation means the LPHB is ideal for use in stony ground.

#### Quick change

Change the auger without tools.

#### Multi talent

The adjustable rotation speed and torque limiter means you can use the LPHB for many applications.

### GET A TEN TON GRIP

This is your best choice when removing hard-to-reach crash barriers and road signs.

With hardened jaws and an automatic chain-tightening clamp, this post puller is ideal for removing all kinds of wooden or steel posts including IPE, HPE, UPE profiles and round/square steel tubes. This post puller develops six tons of hydraulic pulling force. With the help of a optional, separate hand lever you boost the pulling force by an extra four tons. Weighing in at just 60 kg, it is the most compact and portable pulling device on the market. It's perfect for on-site road repairs that cannot be accessed by heavy vehicles/excavators with a ten ton lifting capacity.

**LPP  
10  
HD**

#### Got power

The total available pulling force is ten tonnes.

#### Get a grip

Remove any pole, steel beam or tube with diameter of up to 200 mm (8 in).

#### Reach anywhere

The main use is repairing barriers. Thanks to its low weight it's great for hard-to-reach areas.

Handheld post hole borer		LPHB

# KEEP YOUR TOOLS **RUNNING**

Fuel for outdoor use and electric for indoor use.  
There is a power pack for every occasion and every need.

Our power packs are specialised to power applications in the range that require 20-40 lpm/170 bar. They're light and compact with well protecting frames. Two people can lift and carry the power packs with ease. And they're so small you can stack them on a shelf or in a minivan. The high power to weight ratio means you save both manpower and fuel

during transport. Foldable handles and big wheels also makes it easy to move the power pack around the work site.

Many of the power packs are equipped with Power On Demand (POD). This hydraulic regulatory system automatically idles the engine when the tool is not in use,

and speeds it up when the tool is re-activated.

The thermostatically-controlled oil cooler allows quick warm-ups and helps protect the hydraulic oil from overheating. Correct working temperatures are achieved within minutes – even during the winter.

## Power packs

### Quick tool change

The variable flow on/off valve allows for easy tool change and slow start-up.

### Uptime is cool

Built-in hydraulic oil cooler extends component lifetime and increases reliability in tough, hot conditions.

### Just go!

One person can easily move the power pack around the site thanks to the foldable handle and the large wheels.

### Serve and protect

A robust frame and strong panels protect all vital parts. All service points are easily accessible.

LP  
9-20 P

### Easy to read

All power packs feature a large, easy-to-read filter gauge that indicates when it's time to change the filter.

### Easy oil check

To facilitate control and refills of hydraulic oil, the sight glass and filler cap are placed together.

### Designed for speed

The easy controls, clear instructions and a logical layout of the front panel makes work quicker and safer.

### Fire without smoke

Go for an electric power pack when you want to skip exhaust fumes and emissions.

LP  
18-40 E

### Uptime is in the details

Quality pays off. That's why we use Lombardini, B&S Vanguard and Honda engines.

### Light lifting

You can easily move the power pack with the help of a friend. And it fits in a service van.

LP  
13-20 DEL

# NEED FOR **SPEED** AND POWER

If you need lots of power and the ability to change tools quickly, hydraulics is for you. Hydraulics lets you work both indoors and outdoors.

## **WORKING WITH HYDRAULICS OUTDOORS – GO WILD!**

Working outdoors with hydraulics means you can use electric, diesel or petrol. You can even use a skid steer or back hoe loader as a power supply with HBP-breakers.

## **WORKING WITH HYDRAULICS INDOORS – GO ELECTRIC**

When you want to work without exhaust fumes an electric power pack is your ideal workmate. It's great for indoor work, tunneling and other on-site jobs that require a clean working environment.

- Runs any EHTMA tools that require 20 l/m
- Low weight: 5,5 kW 3x400 v/16 amp industrial motor
- Total weight: 68 kg
- Built-in thermo relay
- CE connector with phase switch for correct pump rotation
- Large filter gauges, thermostatic filter control and filter by-pass
- On/off lever for quick tool change
- Foldable handle with cross bar
- Fully protected motor
- Easy to remove hydraulic parts

# HYDRAULIC BREAKER GUIDE

Hydraulic breakers offer the best power to weight ratio available. Here's how they work.

## E is good for business

Models named E have handles with four vibration dampening springs. That means you can work longer without risking your health.

## Hydraulic accumulator

The cast iron, hydraulic accumulator is charged with nitrogen to make sure the breaker works in both low and high temperatures.

## Great spool design

The spool and socket are lightweight and made from hardened alloy steel. Precise dimensions guarantees spool accuracy.

## Valve housing

Made from hardened cast iron, the valve housing is lightweight, compact and integrates three valves to supply the flow you need.

## Piston for every pressure

The piston allows a heavy strike over the tool. Pistons for HBP versions are designed to work normally with high back pressure.

## Cylinder

The precise dimensions of the cylinder guarantee piston accuracy, uptime and better overall efficiency.

## Accessories

High back pressure breakers (HBP) require an oil flow divider: OFD 20 or OFD 30. An extension hose gives extra working width.

## THIS IS HBP

### HIGH BACK PRESSURE-ENABLED BREAKERS

The HBP-breakers are made to handle high back pressure. It's great for instance when working with a skid steer as a power source or if you are working with particularly long hoses. An ordinary breaker will lose power in those circumstances. It can even be damaged. High back pressure occurs when hydraulic flow in a return line is restricted. It causes a build up of pressure backwards through the line. The pump has to produce more power to overcome the back pressure, which in turn reduces flow in the system.

## BREAKING PAVEMENTS THE RIGHT WAY

Asphalt is a flexible wearing course. A reinforced concrete course is rigid and can handle heavier loads than asphalt. That means you should use different breakers for different pavements.

### ASPHALT – USE MEDIUM BREAKERS

#### Flexible pavement

A part of the asphalt to be removed – **medium breakers 25-30 kg**

### REINFORCED CONCRETE – USE HEAVY BREAKERS

#### Rigid pavement

A concrete slab to be broken – **heavy breakers > 30 kg**
